

Full Stack for AI at Willow

Hi team,

I'd like to express my strong interest in the Full Stack dev for AI role at Willow. I'm excited by Willow's mission to help companies thrive on social media with AI.

With a background in full-stack and AI, I've built and scaled my own AI-based service, Moveread, where I handled everything from R&D to infrastructure and customer outreach. I had to quickly learn new things and discipline myself to manage all aspects of the business.

From this, I'll bring a solid foundation on full-stack and AI, along with an eagerness to learn and push forward. I'd love to discuss how I can contribute to Willow's success!

Best,

Marcel Claramunt
